Summary

Full Stack Developer with 2 years' experience in React, Next.js, Node.js, and MongoDB. Delivered projects in EdTech, FinTech, and SaaS, including dashboards, booking systems, and CI/CD pipelines.

Skills

Languages: JavaScript, TypeScript, Python, Bash, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, shadcn-ui, Vite
Backend: Node.js, Express, REST APIs, Authentication (JWT, OAuth), MongoDB
Testing: Jest, React Testing, Mocha
Cloud/DevOps: AWS (EC2, S3, Elastic IP), Docker, Git, Github Actions, Gitlab CI/CD

Experience

Full Stack Developer, *Garg&Gargs Associates* - Delhi   Apr 2025 - Jun 2025
- Created a custom design for the client's special needs and converted that design into pixel-perfect code
- Built an admin dashboard for the client for easy query, looking decreased the time by **50%** in reverting back
- Added the functionality of automatic email sending for a good customer experience

Frontend Developer, *Cloud Ingenious* - Remote   Jul 2024 - Aug 2024
- Built full full-service website from Figma design
- Worked closely with the team of 4 for creation, deployment and availability
- Kept the SEO score always in the range of **90% to 100%** and also worked on site availability in more than 98 countries

React JS Developer Intern, *StarOps Technologies* - Remote   Nov 2023 - May 2024
- Shipped EdTech, Admin, and Loan Processing dashboards driving **₹30L+/mo in transactions** and **3,000+ partner onboardings** within 4 months
- Accelerated dev velocity **30%** by architecting a reusable UI library and Figma-integrated design system
- **Automated loan eligibility checks** by building a frontend that integrated with bank APIs to validate loans
- **Boosted performance 40%** with code splitting, lazy loading, and S3 images (15% faster loads)
- Partnered with cross-functional teams (sales, finance, founders) to iteratively launch features like onboarding flows and real-time verification

Frontend Developer, *Gateway Car Rental* - Remote   Jan 2023 - Aug 2023
- Escalated booking engagement by **32%** by developing the booking site frontend from scratch with React
- Streamlined rental pricing & availability with custom calculators and logic, improving conversion rates
- Delivered an admin dashboard for rental ops, enabling real-time booking approvals and tracking
- Transitioned from internship to full-time by **delivering UI designs in React**, and leading frontend efforts after initial design/graphic tasks

Projects

HourStack   Github | Demo
- Built a full-stack **Next.js** app with auth, RBAC, client/project/task management, and real-time tracking
- Designed calendar-based UI for time tracking with **ShadCN + Tailwind**, powered by **Redux Toolkit** for global state
- Integrated **Razorpay** for subscription payments and premium feature access
- Deployed via Docker + GitHub Actions → AWS EC2 + NGINX for scalable, production-ready delivery

CI/CD Pipeline with Github Actions   Github | Article
- Automated deployment by building/pushing Docker images to EC2 on every push with GitHub Actions
- Configured NGINX + custom domain for production access, ensuring reliable and consistent releases
- Reduced deployment overhead to **zero manual steps**, streamlining DevOps for production app
